

The process below is for students and faculty to learn how to run a “What-If” analysis.

1. Students who are considering changing programs can enter the new program and it will show the additional courses required if the program is chosen. This allows students to determine if a change of program is the best option.
2. Students are admitted under the catalog in effect at the time they begin enrollment. Program requirements can (and do) change from one catalog to another. Students can run a “What-If” analysis by choosing different catalogs.
 - a. Students can only choose a more recent catalog, or a catalog under which they attended.
